

## Oracle

```
SELECT DISTINCT City, State, Zip from Customer;
```

The screenshot shows the Oracle SQL Developer interface. At the top, there are two tabs: 'Worksheet' and 'Query Builder'. The 'Query Builder' tab is active, displaying the SQL query: `SELECT DISTINCT City, State, Zip from Customer;`. Below the query editor, there is a 'Query Result' tab with a close button. Below this, a status bar shows icons for a pin, print, refresh, and error, followed by the text 'SQL | All Rows Fetched: 2 in 0.025 seconds'. The main area displays the query results in a table with three columns: 'CITY', 'STATE', and 'ZIP'. The results are as follows:

	CITY	STATE	ZIP
1	Louisville	CO	80027
2	Boulder	CO	80309
