

## Oracle

```
SELECT EmpName, Department, Email, Phone FROM Employee;
```

The screenshot shows the Oracle SQL Developer interface. At the top, there are two tabs: 'Worksheet' and 'Query Builder'. The 'Query Builder' tab is active, displaying the SQL query: `SELECT EmpName, Department, Email, Phone FROM Employee;`. Below the query editor, there is a 'Query Result' tab. It shows the execution status: 'All Rows Fetched: 4 in 0.006 seconds'. Below this, a table displays the query results with four columns: EMPNAME, DEPARTMENT, EMAIL, and PHONE. The results are as follows:

	EMPNAME	DEPARTMENT	EMAIL	PHONE
1	Chuck Coordinator	Administration	chuck@colorado.edu	3-1111
2	Mary Manager	Football	mary@colorado.edu	5-1111
3	Sally Supervisor	Planning	sally@colorado.edu	3-2222
4	Alan Administrator	Administration	alan@colorado.edu	3-3333
