

Oracle

```
SELECT LocNo, LocName FROM Location  
  JOIN Facility ON Location.FACNO = Facility.FACNO  
 WHERE Facility.FACNAME = 'Basketball arena';
```

The screenshot displays the Oracle SQL Developer interface. The 'Query Builder' tab is active, showing the following SQL query:

```
SELECT LocNo, LocName FROM Location  
  JOIN Facility ON Location.FACNO = Facility.FACNO  
 WHERE Facility.FACNAME = 'Basketball arena';
```

Below the query editor, the 'Query Result' pane shows the results of the query. It indicates that all rows were fetched in 0.01 seconds. The results are displayed in a table with two columns: LOCNO and LOCNAME.

	LOCNO	LOCNAME
1	L103	Locker room
2	L105	Gate
